

YOUNGPLANTS ASSORTMENT 2027

slijker mankalanchoë

Inspire to Create

Introduction

At SlijkermanKalanchoë, specialization means full commitment. We are involved in every step of the kalanchoe journey, from breeding and cuttings production to large-scale cultivation at our own facilities and with trusted partners around the world. With over 40 years of kalanchoe growing experience and 25 years of dedicated kalanchoe breeding expertise, we combine in-depth knowledge with a forward-looking vision.

As a family-owned company with roots dating back to 1946, innovation has always been part of our DNA. What began in horticulture evolved into a strong and exclusive focus on kalanchoe, leading to an internationally operating family business now guided by the third generation.

Our breeding is driven by the needs of growers worldwide. We understand that cultivation conditions, market requirements and consumer preferences vary across regions and climate zones. By working closely with growers and partners around the globe, we develop varieties that perform reliably under diverse conditions.

With an exceptionally broad assortment, we are able to offer the right solution for every grower, every market and every climate. Through the synergy of breeding and growing, we continuously refine our varieties to support efficiency, uniformity and quality. Inspiring growers worldwide to create outstanding results.

Inspire to create.

KALANCHOË
DIAMOND®

Kalanchoë **Supernova®**

Meet Supernova®, a true breakthrough in kalanchoe breeding. Its spectacular blooms consist of multiple flowers fused into one impressive explosion, inspired by the power and beauty of a supernova. With over 50 petals per flower, a diameter of up to 5 cm (2") and an exceptional shelf life, Supernova® delivers an out-of-this-world performance at retail.

Serenity®

A close-up photograph of a Kalanchoe plant with clusters of small, light pink and white flowers. The plant has thick, green, rounded leaves. It is potted in a white ceramic pot with vertical purple stripes. In the background, a white ceramic vase holds dried, fluffy plant stems. A small, lit candle in a glass holder is visible in the bottom right corner.

The Serenity® series features a harmonious range of soft pastel tones. All colors are genetic mutants of one another, resulting in exceptional uniformity in growth and flowering. This makes the series ideal for combining multiple colors in one pot. With a minimal need for growth regulators, Serenity® offers reliable and consistent performance.

Tiger[®]

KALANCHOË

The Tiger[®] Majestic collection is the double-flowered counterpart of the Tiger[®] Safari collection. Its full blooms ensure an extended shelf life, while the refined patterns around the flower heart add depth and sophistication. Together, these features create a timeless and majestic appearance.

SINGLES

KALANCHOË DIAMOND®

Derived from the Ancient Greek word *adámas*, meaning “unconquerable,” the Diamond® single flower collection lives up to its name. Carefully selected for strength and resilience, these varieties combine elegant simplicity with outstanding longevity. Their robust nature also makes them perfectly suitable for outdoor use during summer.

Tiger®

KALANCHOË

The Tiger® Safari collection features three striking single-flowered varieties distinguished by bold contrasts and expressive flower markings. The distinctive flower hearts echo the patterns of wild animals, giving each plant a powerful, natural character that perfectly matches the strength and charisma of the tiger.

A still life composition featuring terracotta pots and plants. In the foreground, a terracotta pitcher with a handle and a geometric pattern sits on a matching saucer. To its right, a small potted plant with green leaves is visible. In the background, another terracotta pot holds a plant with long, thin leaves. The scene is set on a wooden surface, and the background is softly blurred.

CUT FLOWERS

Soraya

KALANCHOE

Inspired by its roots in the ancient Persian Empire, Soraya® series represents elegance and feminine strength. All colors are genetic mutants of one another, resulting in uniform growth and flowering. This makes the series ideal for growing multiple colors together, even in small quantities. Available in a range of delicate pastel shades with excellent vase life.

* These varieties are covered by the following patents: European Patent EP3099165, Canadian Patent CA2936568, Chinese Patent CN106163275B, Japanese Patent JP6301499 and JP6721564B, Russian Patent RU2629222, Turkish Patent TR201708434, United States Patent US10932426, Brazilian Patent BR112016017365. Method for prolonging the longevity of cut flowers: Dutch Patent NL 2012150.
