YOUNGPLANTS CATALOG 2024

Inspire to Create

History

Founder Cor Slijkerman started in 1946 with the cultivation of vegetable crops. Later, when the first greenhouses appeared, he started growing gerberas and pot chrysanthemums. When his son Johan Slijkerman (second generation) took over the company, a switch to the cultivation of Kalanchoe was made and in 2001 he started breeding his own varieties. Nowadays, Stefan Slijkerman (third generation) is in charge of the international operating organization.

Youngplants

We have over 35 years of experience in selecting and cultivating Kalanchoe cuttings. We produce our cuttings at several production sites all across the globe, with respect to our people and the planet. This way, we can provide fresh cuttings, ensuring a good start for growing Kalanchoe flowers of a high quality.

Breeding

Our team of qualified staff is working on innovative Kalanchoe varieties, using modern techniques every day. Time and again we pioneer in creating new colours, new cultivation methods and a better shelf life. We have varieties suitable for different pot sizes and climates, providing growers worldwide a distinctive assortment.

Production

We produce flowering Kalanchoe in a highly automated greenhouse of 50.000 m² in the Netherlands. We do this in a sustainable way, for which we make use of biological crop protection. As a result, we are MPS Product Proof certified. Our production facility gives growers the opportunity to experience our varieties in a practical set-up.

'That is how I like to inspire to create.'

Growth

- ○ ○ ○ ○ compact
- ● ○ ○ medium-compact
- ● ● ○ ○ medium
- ● ● ● ○ medium-vigorous
- ● ● ● ● vigorous

Heat tolerant Indicates whether a variety can retain its quality in hot climates

Long days Indicates the average time required in long days

Response time Indicates the time required in short days until flowering

* The information shown is based on growing under Dutch circumstances (at an average temperature of 21° Celsius) and international trials.

The response time is an average value of experiments conducted in the Netherlands during weeks 9 to 13. No rights can be derived from it.

Tiger Safari®

EN

Discover the beauty of the Tiger Safari. With three single-flower varieties that transform each flower into a masterpiece with an eye-like pattern, this series evokes associations with the robust tiger. Let yourself be enchanted by the designs surrounding the flower hearts, which give these flowers a unique and powerful character. The drawings of the flower hearts provide a distinctive and strong character to the flowers.

NL

Ontdek de schoonheid van de Tiger Safari. Met drie enkelbloemige rassen die elke bloem transformeren tot een meesterwerk met een oogachtig patroon, roept deze serie associaties op met de robuuste tijger. Laat je betoveren door de tekeningen rondom de bloemhartjes, die deze bloemen een uniek en krachtig karakter geven. De tekeningen van de bloemenhartjes geven de bloemen een uniek en krachtig karakter.

Tiger Majestic®

EN

The double-flowered member of the Tiger Series. Due to the double-flowering nature of the plant, its longevity is relatively extended. The Tiger Majestic is also characterized by the designs surrounding the heart of the flower, which allude to the timeless elegance of the Tiger Majestic.

NL

De dubbelbloemige variant van de Tiger-serie. Mede door de dubbelbloemigheid van de plant is de houdbaarheid relatief lang. Ook de Tiger Majestic wordt gekenmerkt door de tekeningen rondom het hart van de bloem die verwijzen naar de tijdloze elegantie van de Tiger Majestic.

Diamond® Single Collection

EN

The word "diamond" originates from the Ancient Greek word "adámas," meaning "unconquerable" or "indestructible." The single-flowered variant of the Diamond Collection has been specifically selected for these characteristics. With above-average longevity, the flower will continue to shine brightly in any living space for a long time.

NL

Het woord "diamant" vindt zijn oorsprong in het Oudgriekse woord "adámas", wat "onverslaanbaar" of "onverwoestbaar" betekent. De enkelbloemige variant van de Diamond Collectie is op deze kenmerken speciaal geselecteerd. Met een bovengemiddelde houdbaarheid zal de bloem nog lang schitteren in elke huiskamer.

Diamond® Double Collection

EN

The diamond has been cherished for centuries for its beauty and purity. These characteristics also define the double-flowered varieties of the Diamond Double Collection. Additionally, these have an above-average longevity.

NL

De diamant wordt al eeuwenlang bemind om haar schoonheid en zuiverheid. Dit kenmerkt ook de gevuldbloemige rassen van de Diamond Double Collection. Deze rassen hebben bovendien een bovengemiddelde houdbaarheid.

Serenity® Series

EN

The Serenity series is characterized by a lush collection of soft, sweet pastel tones that delight the senses. This series is beloved for its minimal need for growth regulators and the uniform properties that are perfectly harmonized, allowing them to be combined effortlessly.

NL

De Serenity-serie, gekenmerkt door een weelderige verzameling van zachte, zoete pasteltinten die de zintuigen strelen. Deze serie is geliefd vanwege de minimale behoefte aan remstoffen en de uniforme eigenschappen die perfect op elkaar afgestemd zijn zodat ze moeiteloos gecombineerd kunnen worden.

Kalanchoe Cutflowers

Soraya® Cutflower

EN

The name Soraya originates from the ancient Persian Empire and carries multiple meanings such as gemstone, wealth, and princess. This emphasizes the powerful, feminine energy radiated by the Soraya cutflowers, making it not just a flower but a symbol of refinement, beauty, and royal allure. These long-lasting cut flowers are available in a spectrum of delicate pastel shades.

NL

De naam Soraya vindt zijn oorsprong in het oude Perzische rijk en draagt meerdere betekenissen zoals edelsteen, rijkdom en prinses. Dit benadrukt de krachtige, vrouwelijke, energie die de Soraya uitstraalt, waardoor het niet slechts een bloem is, maar een symbool van verfijning, schoonheid en koninklijke allure. Deze lang houdbare snijbloemen zijn beschikbaar in een spectrum van delicate pasteltinten.
